### **DESCRIPTION**

The Hawkeye Relay Combination Series is the ideal solution for the automation installer. These units combine a current switch and relay into a single package, reducing the space required for total control of fans and pumps. The current switch and relay operate independently of one another. These devices allow start/stop control and status monitoring with one device instead of two.

### **APPLICATIONS**

- Starting/stopping and monitoring positive status of motors
- Detecting belt loss and coupling shear
